Which is Best?

Pedicraft Beds are not just for children — falling from a bed can be tragic for an older patient as well. Anyone with diminished mental capabilities needs special safeguards. Our beds are designed to give peace of mind to caregivers, as well as paramount comfort for patients.

Consider the following when determining the best bed for you and your patient:
• Cribs are a dependable solution when all care is provided to the patient in bed.
• The Stay Safe Bed™ is perfect for the patient who is sometimes transitioning back and forth to a chair or wheelchair.
• The Canopy™ Enclosed Bed and Stay Safe Bed™ are soft, noise, with no exposed metal parts.
• The Soft Vinyl Top is a nice addition when a patient is able and complete enclosure is required for the patient’s health.
• The Stay Safe Bed™ is a comfortable setting when the patient will not try to get out of bed voluntarily.
